December 2001

Mt. Tron University of Peace Foundation

No. 4, Volume 4

## Look - the University of Peace on Mt. Tron!

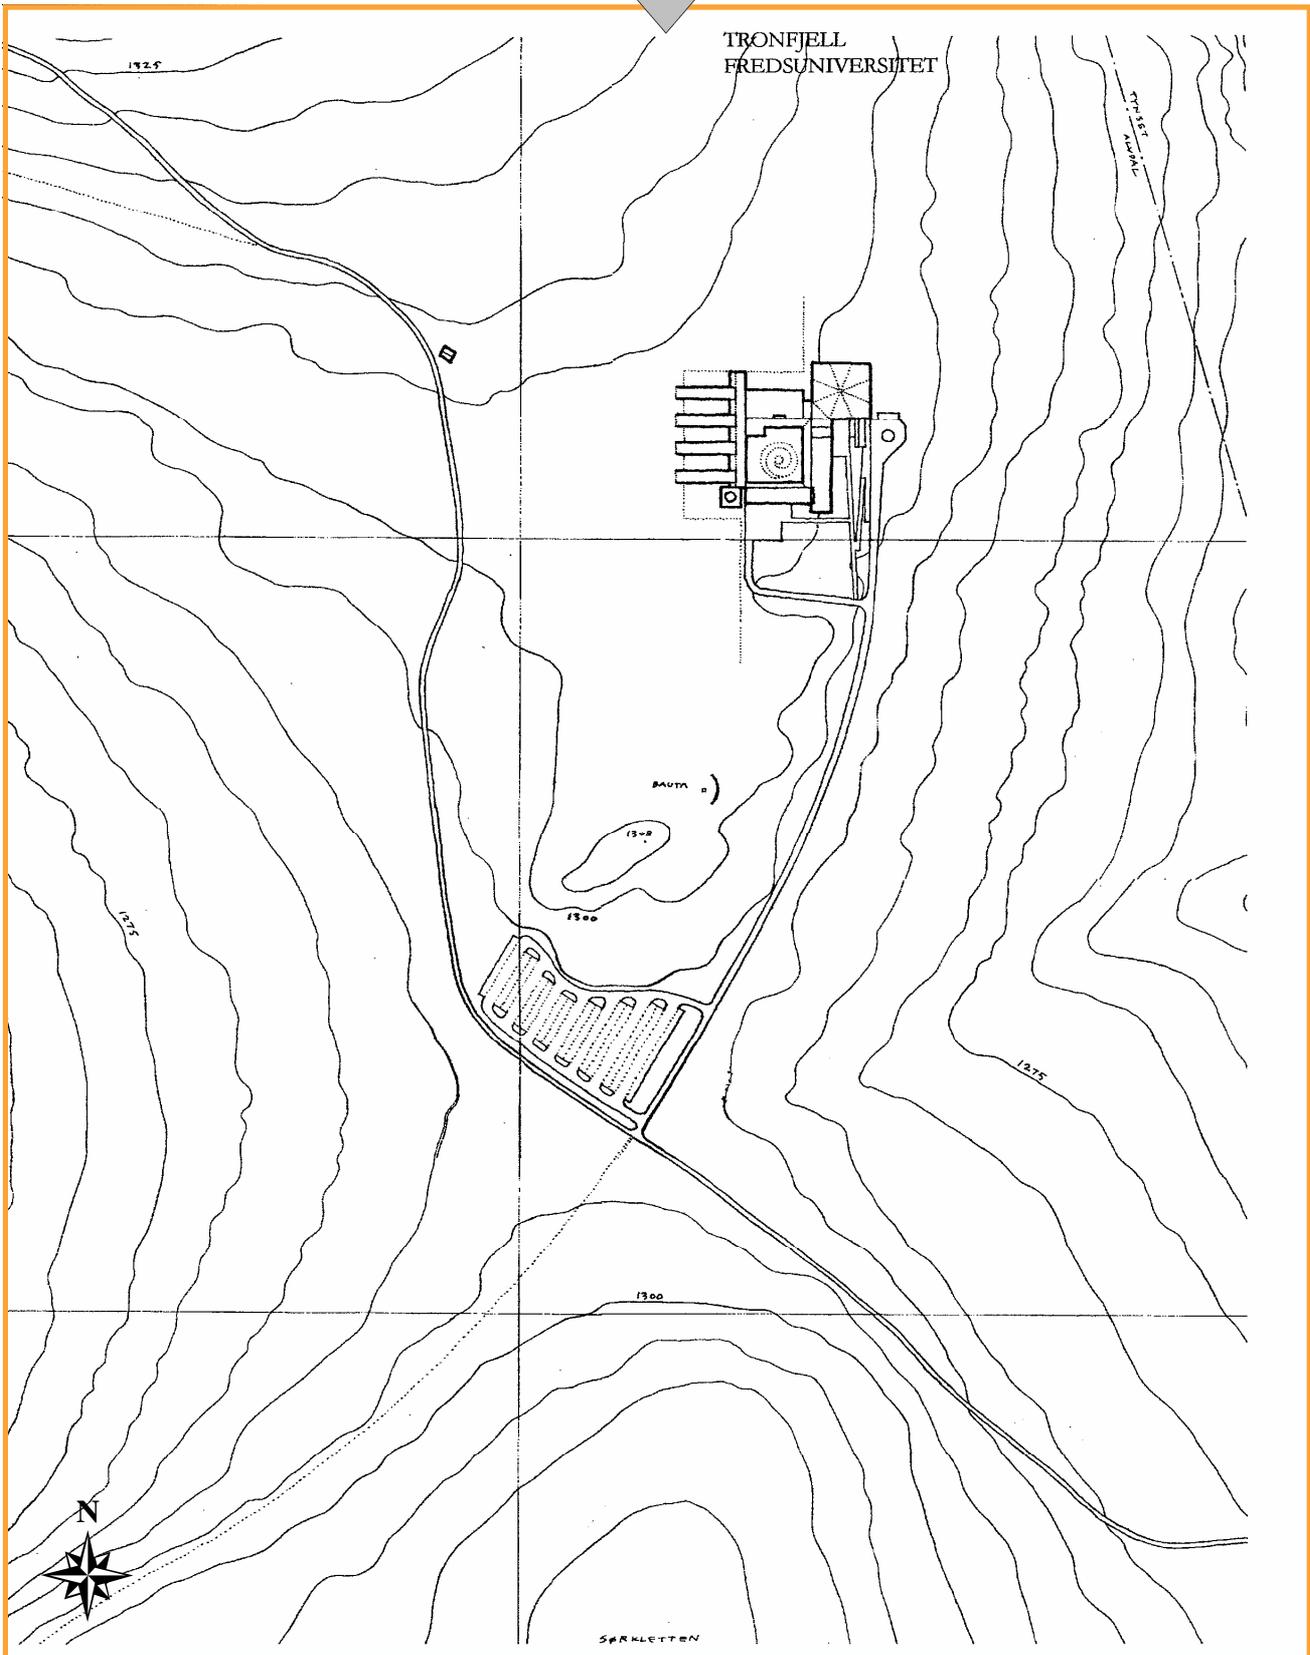

*Pasteboard model of the Peace University placed on the 'Peace Plateau' by computer. The model has correct size and is correctly placed and directed in relation to the surroundings. Aerial photo: BP, August 2000. Pilot: Svein Ellingvåg. Installation: professor architect Knud Larsen.*

### **The University of Peace on the 'Peace Plateau'**

In the future pilots will be able to view the Peace University on Mt. Tron in this way (see the picture above), except that the building fronts of course will be coated by stone and wood, and the roof with grass. In the picture above the construction is seen from south-east towards north-west. The part of the Mt. Tron Road which crosses the plateau is visible, together with the starting climb towards the top, far behind and on the right in the picture. The planned car parking and road into the construction, is not included in the picture but will be found to the south and east in the picture respectively. The altitude of the plateau is about 1300 metres and the summit is 1666 metres.

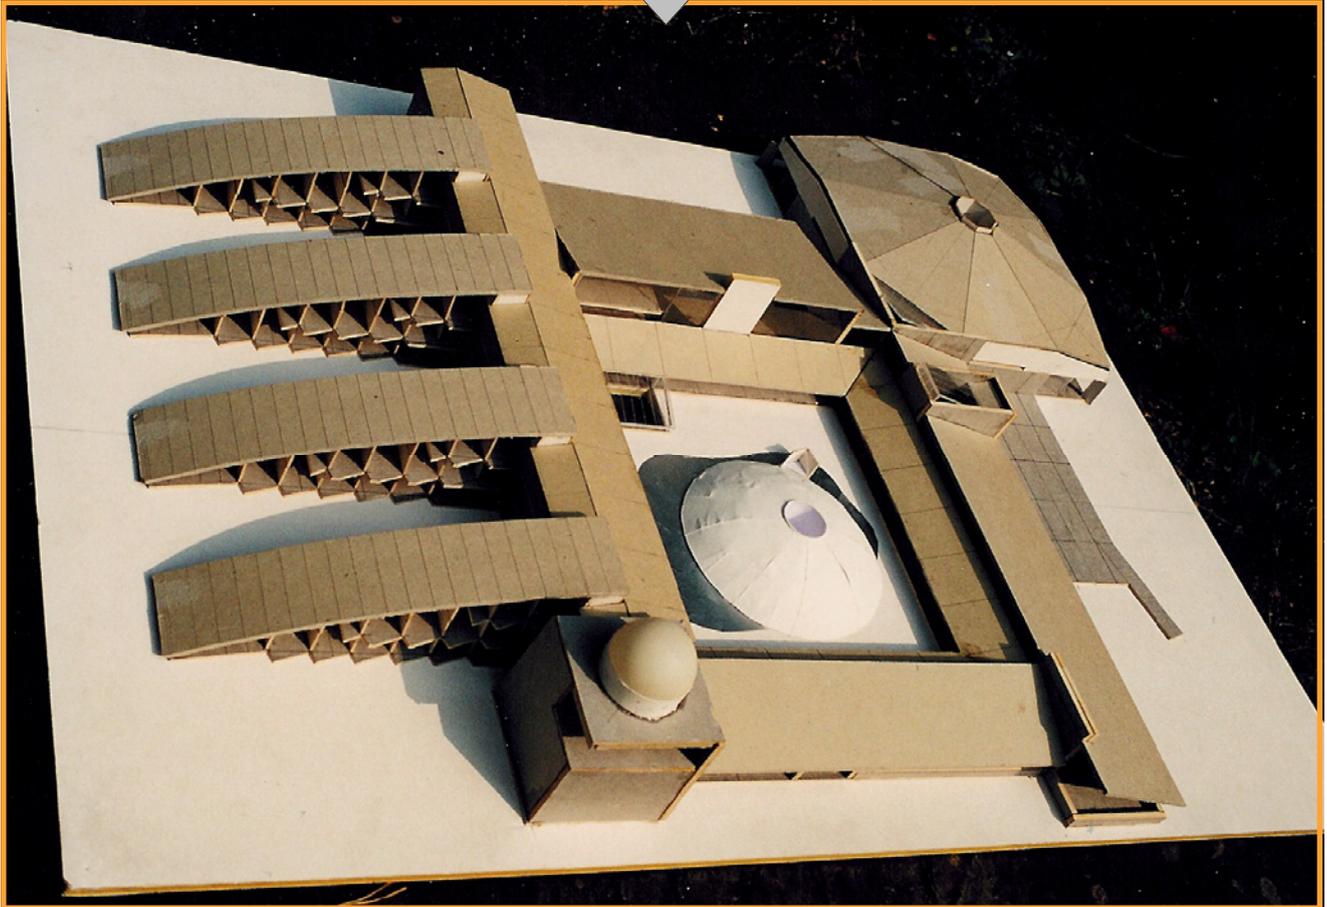

The intention of the Foundation is that the whole construction will be built according to ecological principles for energy and sanitary functions, i.e. that heating, light, ventilation, discharge, sewage systems, etc., will be based on the newest and most appropriate technology in accordance with an ecological way of thinking. The energy supply will for instance be based on several alternative sources and the construction will be self-contained and independent of supply from outside. It will be existing and 'breathing', and be self-regulating in all its 'most vital 'life-functions'', almost as a living organism. The Foundation will be working to make the University of Peace an interesting ecological pioneer project for constructions of this size and with such extreme climatic challenges.

## (2) New drawings and a new model to...

Site plan over the University of Peace at the 'Peace Plateau' on Mt.Tron. Here the car-parking and the road into the construction is seen. Between the car-parking and the university the memorial (menhir) is seen.  
Drawing: professor architect Knud Larsen, August 2001.

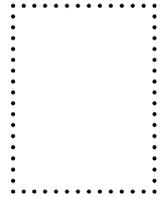

## The Mt. Tron University of Peace

*Pasteboard model of the Mt. Tron University of Peace, seen from above in an angle, from south-west (above) and from east (below). The model is included in the Foundation's pre-project, made by professor architect Knud Larsen in August 2001. Both photos: BP.*

## News from Mt.Tron

### Presentation

The Mt.Tron Mail continues to present the plans of the Foundation's pre-project which is now taking shape, and which was started by Knud Larsen in July/August this year. We are now working determinedly to make a complete presentation of the whole project both digitally and on paper, so that we later can contact selected persons who might be willing to possibly support the project and contribute to it's realization - hopefully not in a too distant future.

Architect and professor Knud Larsen deeply consentrated in his work with the correct placement of the University of Peace on a pasteboard model of the 'Peace Plateau', in his spacious office at Ljan, Oslo, in August 2001. Photo: BP.

### Subscription

At the bottom of the name and address label (sticker) on the Mt.Tron Mail there are some figures, f.inst.: 99-00-01. These figures show the status for payed subscriptions in number of years. Those who still didn't pay for this year will not find the numbers 01 on their label, and they are hereby invited to pay.

We will seize the opportunity to thank all the loyal subscribers for their company, and wish all a Merry Christmas and a Happy New Year!
